Reviews of clients are given to let new people aware about our achievements and reliability.

- **Blogs:** Some blogs are given about our Book store.

Footer includes “location”, “quick links”, “extra links”, “contact us”, “contact info”.

‘That is all about our website’

Course Outline

In this course we learnt *HTML* , *CSS* , *JAVASCRIPT*, *MEDIA QUERY*, *BOOTSTRAP*. All these are covered in this website “Book Hub” except bootstrap.

Html: ‘Hyper text markup language’ is the programming language and is the first step in a website that is a website's structure. All other steps come after this have been included.

CSS: ‘Cascading Style Sheet’ is the styling of any website like if we have to add colors, fonts, text styles, background so we have to do CSS, that is also a programming language.

Javascript: An other programming language that works on functioning of a website is Javascript. If we have to run the options included in our websites like search engine etc. than we go towards Javascript.

Media query: To make our website be run on every screen size that are *computer, laptop, tablet* and *mobile screens* so we have to include media query in the website.

Our reviews about this course:

It is very beneficial and exciting to learn with Banoqabil institute in this *Website development course* We learnt a lot from here in a peaceful and well mannered environment .

Management is good and teaching style and our teacher's knowledge is also appreciable.

Thank you to give us opportunity to do this IT course.
